

Portable Hydrogen Inhalation Machine with 300ml O2 Output and SPE PEM Technology for Home Use with 3-Year Warranty

Our Product Introduction

for more products please visit us on weizi-medical.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Weizi
- Minimum Order Quantity: 1 piece
- Price: \$1,050-1,160 / piece

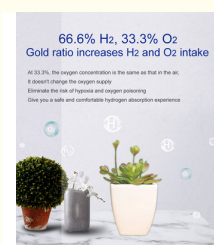

Product Specification

- Production Rate: 200pcs/month
- Weight: 15.5kg
- Dimensions: 21x33x40cm
- Hydrogen Output: 600±10 ML/min
- Oxygen Output: 300±10 ML/min
- Flow Rate: 900, 600, 450ml/min
- Voice Broadcasting: English/Japanese/Chinese
- Timer Setting: 30 Minutes To 5 Hours
- Working Life: 8,000 Hours
- Power: 280w
- Voltage: AC90-260V, 50/60Hz
- Technology: SPE And PEM
- Water Requirement: Distilled Water <3ppm TDS
- H2 To O2 Ratio: 2/3 H2 And 1/3 O2 Or 2 H2 And 1 O2
- Inhalation Duration: 30 Minutes To 12 Hours

Product Description

900ml Mass of Hydrogen Gas 1500ml Asthma Inhaler 600ml Hydrogen Energy for Health

Inhalation of Hydrogen or Hydrogen + Oxygen

The therapeutic benefits of increased oxygen supply are well established. Hydrogen has emerged as a valuable medical agent due to its proven therapeutic and preventive effects on numerous health conditions.

Our Product

The standard gas mixture ratio is typically 2/3 H₂ and 1/3 O₂ (or 2:1 H₂ to O₂). Clinical studies demonstrate hydrogen's ability to reduce reactive oxygen species (ROS) in tissues while providing antioxidant and anti-inflammatory benefits.

Hydrogen inhalation therapy delivers molecular hydrogen gas (H₂) to support health improvement and maintenance.

Health Benefits of Hydrogen Inhalation

- Reduced inflammation:** Helps combat chronic inflammation linked to numerous diseases
- Reduced oxidative stress:** Acts as a powerful antioxidant to neutralize harmful free radicals
- Neurological protection:** Supports brain health and may help prevent neurodegenerative disorders
- Enhanced athletic performance:** Reduces exercise-induced fatigue and muscle damage
- Improved digestion:** May alleviate symptoms of IBS and other digestive disorders

Recommended Usage Guidelines

30 minutes of hydrogen inhalation provides therapeutic effects lasting 5-6 hours. Consistent use enhances cumulative benefits.

Usage recommendations:

- General health maintenance:** 30 minutes daily
- Chronic health conditions:** 1-4 hours daily
- Acute conditions/recovery:** 8-12 hours daily (including overnight use)

Most users report noticeable improvements within 1-2 weeks of consistent therapy.

Technical Specifications

Technology	SPE and PEM (latest generation)
Flow Rates	900, 600, and 450ml/min options
Max Hydrogen Output	600±10 ml/min
Max Oxygen Output	300±10 ml/min
Voice Broadcast	English/Japanese/Chinese
Timer Settings	30 minutes to 5 hours
Working Life	8,000 hours
Power Requirements	280W, AC90-260V, 50/60Hz

Note: Always use high-quality distilled water with Total Dissolved Solids (TDS) below 3ppm.

Scientific Validation of Hydrogen Therapy

Over 1,500 medical studies support hydrogen therapy's effectiveness in health improvement, recovery enhancement, and supporting natural healing processes.

Our portable hydrogen inhaler delivers hydrogen at clinically validated flow rates to ensure optimal therapeutic benefits.

Company Profile

Shenzhen Weizi Medical Co., Ltd is a high-tech enterprise specializing in hydrogen health product R&D, manufacturing, and distribution. Our product line includes hydrogen inhalation machines, hydrogen water generators, and combined oxygen-hydrogen systems.

Since 2012, we've collaborated with over 10 Chinese hospitals. Our hydrogen therapy devices proved particularly effective during the 2019 viral outbreak. With core patented technologies and a medical professor-led R&D team, we maintain strong innovation capabilities.

We offer professional ODM/OEM services and hold multiple international certifications including CE, FCC, VOC, UKCA, CNAS, and RoHS. Our international team includes medical professionals with experience in Germany and other global markets.
